

Artificial Intelligence • Bioinformatics • Digital Health

Building the next generation of AI-driven infrastructure for predictive health, precision medicine, and scientific innovation.

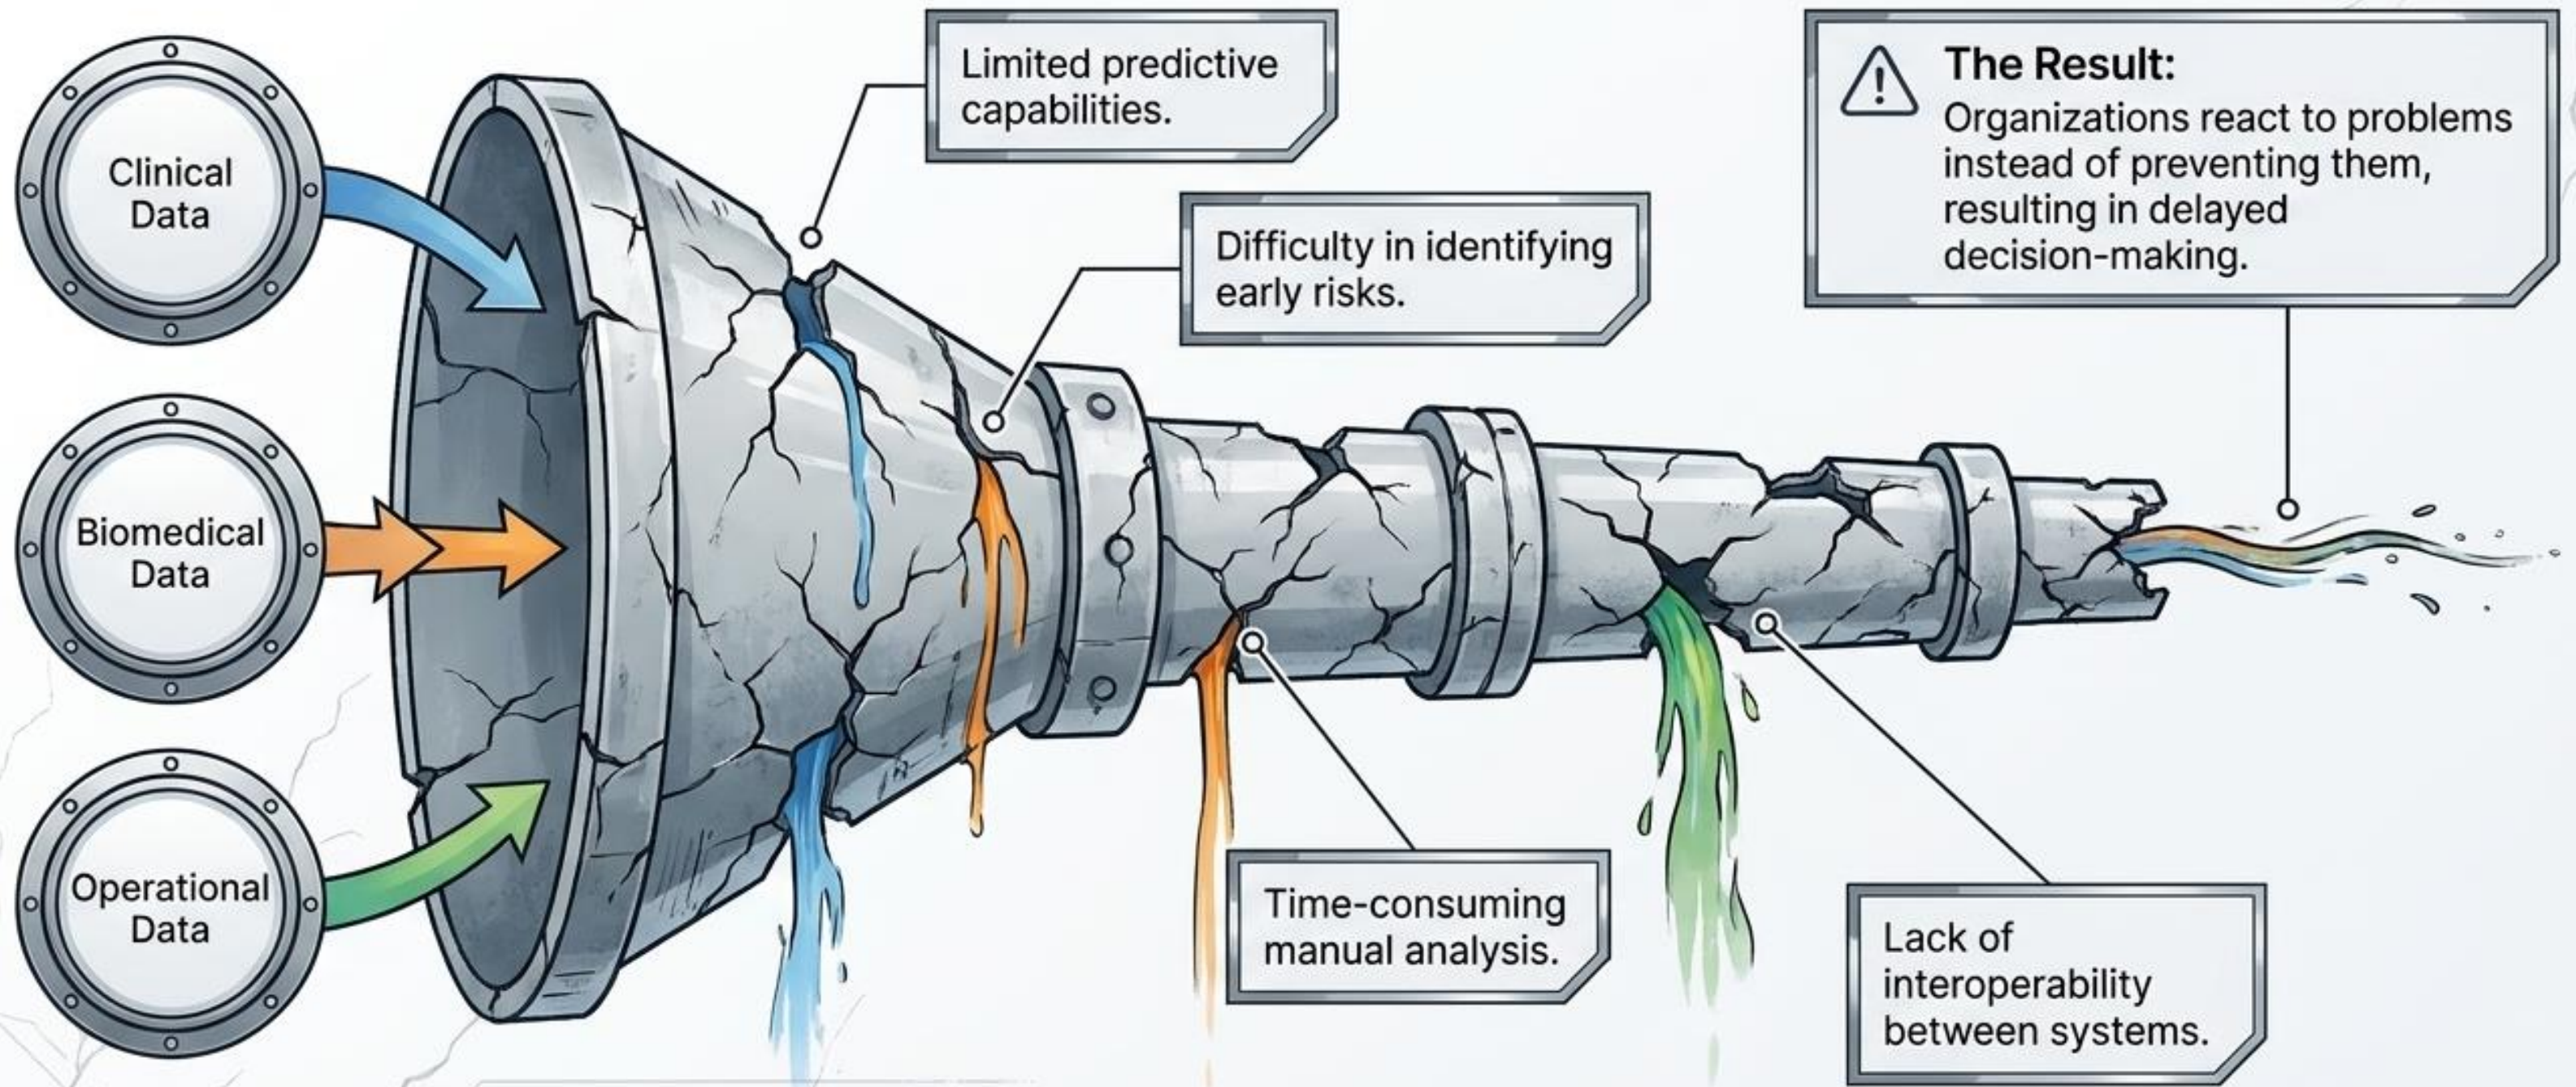

Founder: Ingrid Alvarado | Santa Marta, Colombia | 2026

A future where artificial intelligence transforms health through prevention, prediction, and scientific discovery.

BioPath Sentinel AI is projected as a global platform that connects predictive analytics, bioinformatics, and digital health within a unified ecosystem.

Our goal is to empower healthcare organizations, researchers, and industry to make faster, smarter, and evidence-based scientific decisions.

The Fragmented Data Funnel

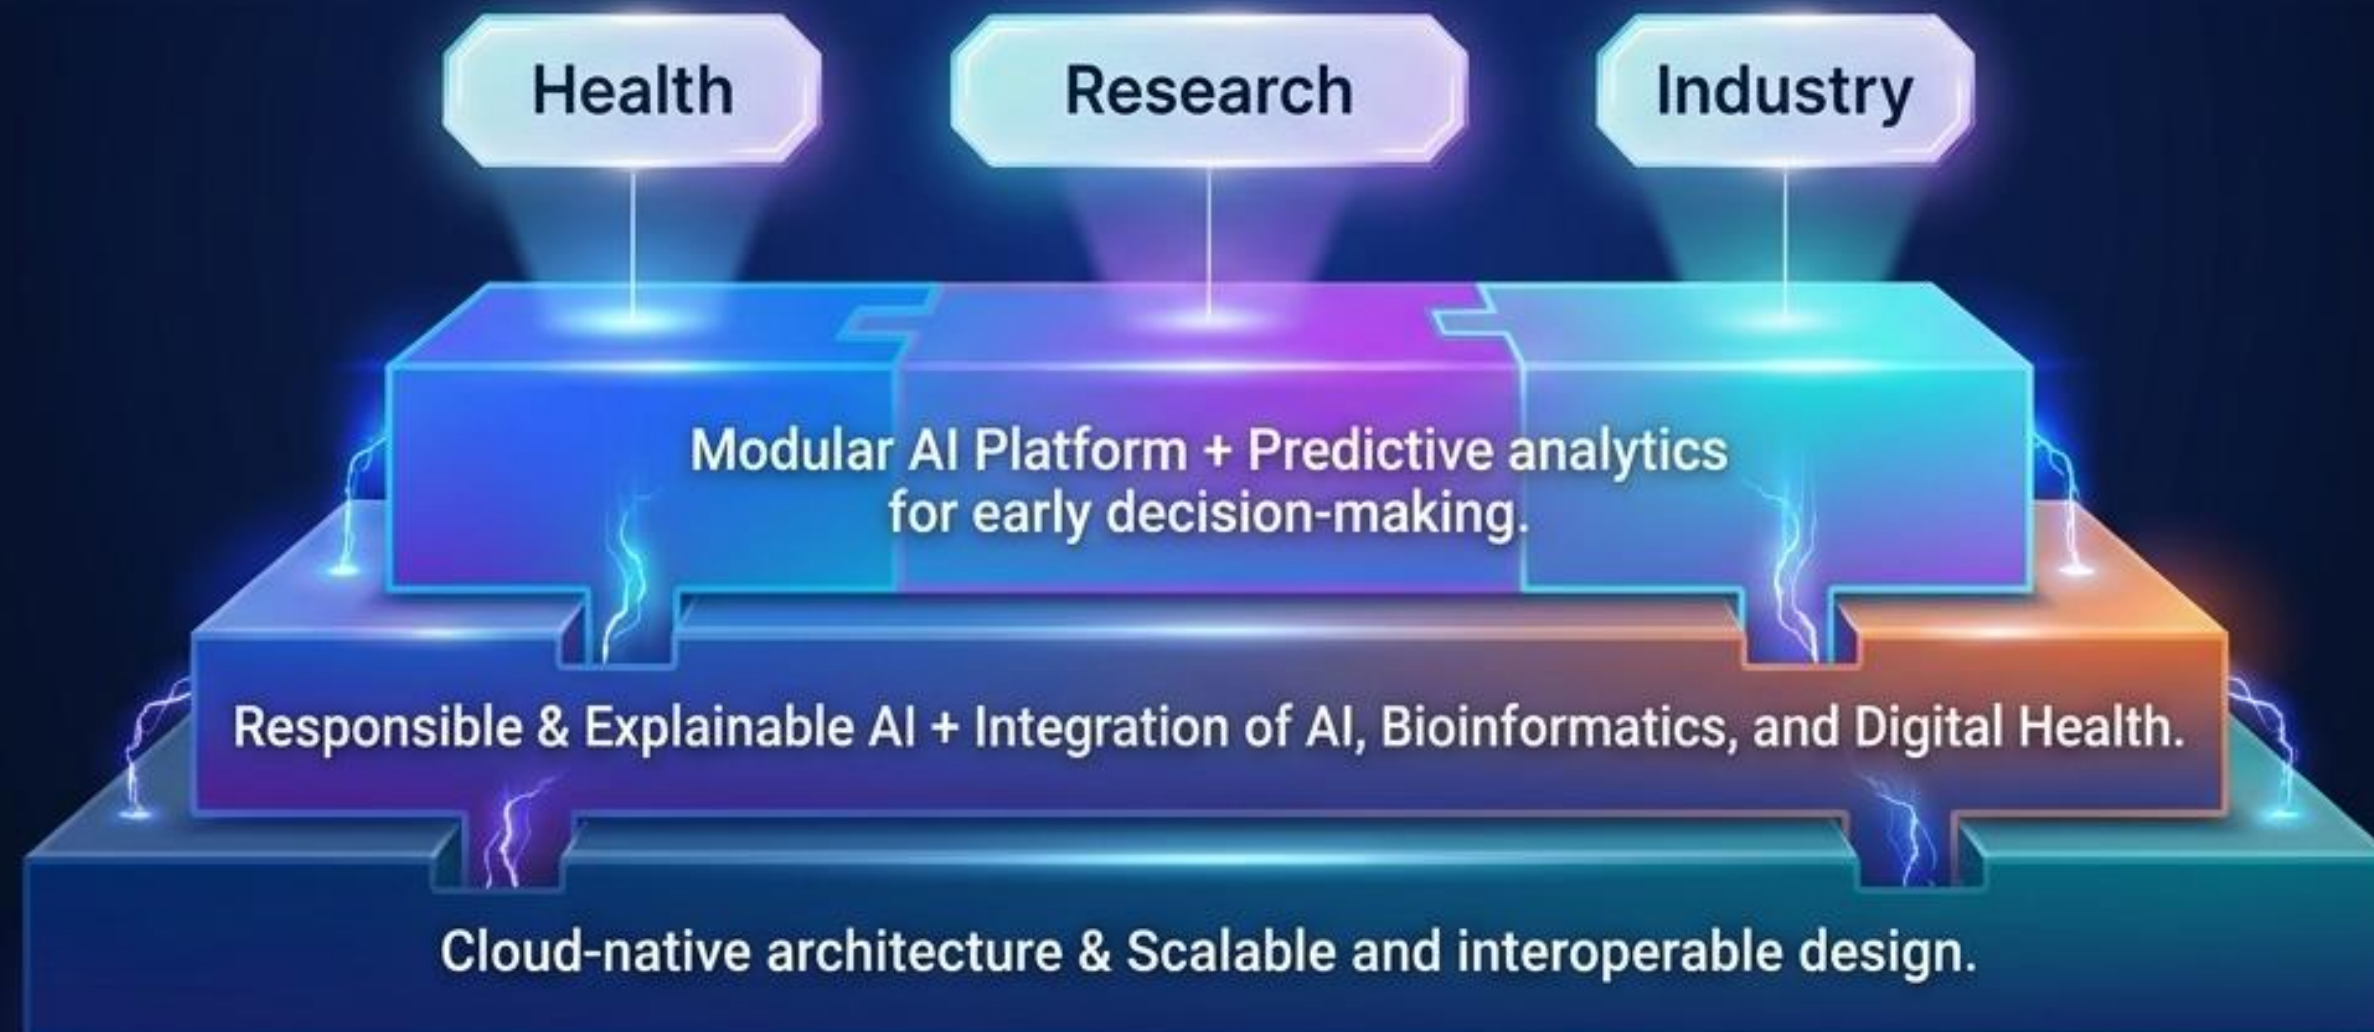

The Paradigm Shift: Reactive vs. Predictive

	The Traditional Paradigm	The BioPath Paradigm
Data	Fragmented and isolated.	Interoperable and unified.
Analysis	Manual, retrospective, and slow.	AI-driven, real-time predictive analytics.
Action	Reacting to disease.	Early identification and proactive prevention.

Why BioPath Sentinel AI?

We are building infrastructure, not just software.

Our Solution: The BioPath Sentinel AI Engine

The Platform Ecosystem

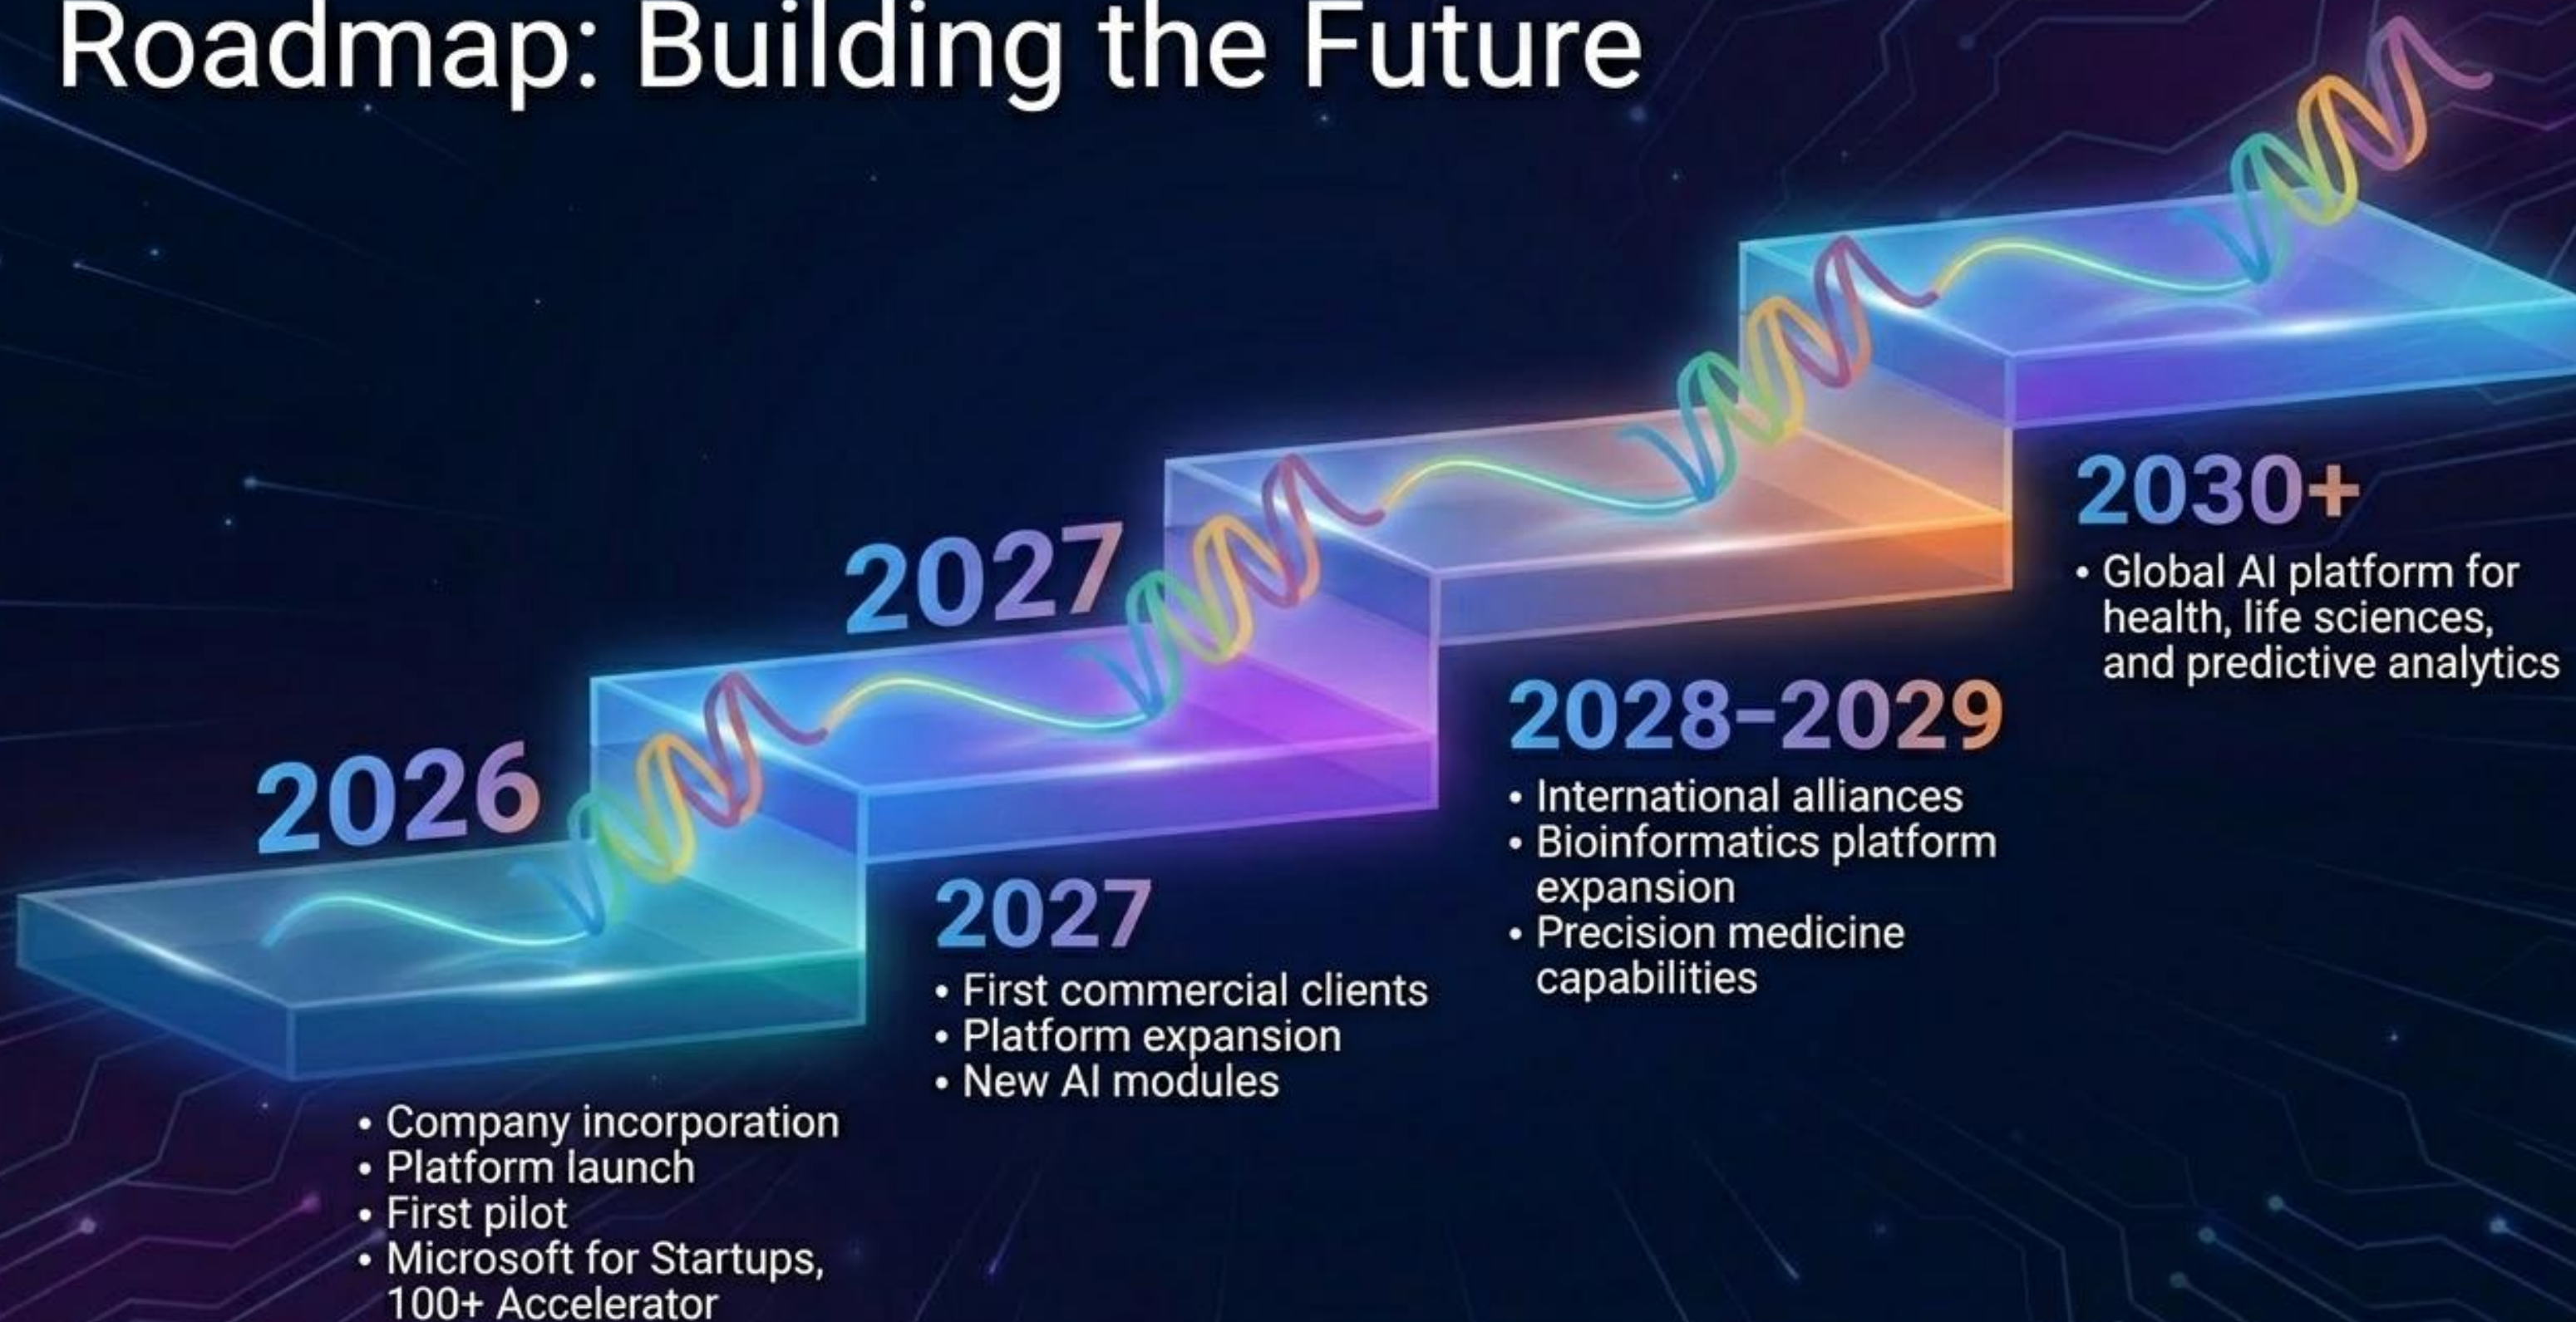

Global Market Opportunity

High demand in:

- Decision support
- Predictive health
- Digital transformation
- Precision medicine

Roadmap: Building the Future

We are building global AI infrastructure, but we validate it one organization at a time.

Our immediate goal is to collaborate with corporate strategic partners to demonstrate predictive impact in real-world settings.

Pilot Proposal (6-9 Months)

Expected Results

- ✓ Improved decision support
- ✓ Faster data analysis
- ✓ Actionable predictive insights
- ✓ Recommendations for long-term scalability

Built by Science

Systems Engineer

Master's in Biomedical Engineering

Master's in Molecular Simulation

Artificial Intelligence

Bioinformatics

Digital Health

Predictive Analytics

Molecular Simulation

Cloud Computing (Microsoft Azure)

“

BioPath Sentinel AI was born with the vision of combining AI, bioinformatics, and computational science to develop reliable technologies that drive health and innovation. Innovation begins where science meets artificial intelligence.

”

BIOPATH SENTINEL

Building reliable AI solutions for predictive health,
precision medicine, and scientific innovation.

**Let's build the future of
intelligent health together.**
